

Star in the Sky

(Mary Potter)

(Chorus)

There's a star there in the sky
Star in the East and I wonder why
Star there in the sky a million miles away

When you look up in the sky
See the stars go floating by
You may ask the reason why
Why the stars are there and why we're here

(Chorus)

There's a star there in the sky
Star in the East and I wonder why
Star there in the sky a million miles away
