

Chasing the Blues Away

(Mary Potter)

We're the blue people, how do you do?
You're looking sad so we've come to visit you
We haven't come to quarrel, we haven't come to fight
We've come to chase the blues away and make the world seem bright

We're going to cheer you up, we'll take a twiddly twirl
And to and fro we'll heel and toe and walk a wiggly whirl
For there's one thing that we do all day
It's chasing the blues away, oh yeah, chasing the blues away!

You needn't feel so blue just try a smile and soon
You will hum a little tune and fly off to the moon
Choose to shake off all your blues
You've got nothing left to lose
Just your worried frown
That only gets you down

We're feeling better, we're feeling great
We can dance the blues away from early until late
You've made us feel so happy, you've chased away the blues
We're hopping and we're bopping and we've found our dancing shoes
We think we've found the secret, it's what we're looking for
To keep the planet spinning round we'll hop and bop some more
For there's one thing that we do all day,
It's chasing the blues away, oh yeah, chasing the blues away!
